

17.11.17

NOBEL PRIZE PARTY

Lecture on the Nobel Prize of Chemistry 2017

This year Jacques Dubochet, Joachim Frank and Richard Henderson were awarded the Nobel Prize in chemistry for developing cryo-electron microscopy for the high-resolution structure determination of biomolecules in solution. Professor Øyvind Halskau, from the department of molecular biology at UoB, will join us for the evening and give us a lecture on the subject of this year's Nobel prize.

After the lecture there will be the traditional festivities with seafood, refreshments and good company ☺

When signing up, remember to let us know if you prefer seafood or a vegetarian alternative.

Remember to sign
up before 13.11
